

It is already an accepted fact that every single person in the world has a different set of fingerprints. The Chinese have devised a way to read personality & destiny traits by studying the waves and the circles that appear at the tips of everyone ' s fingers - indeed so convinced are they that in the old days the fingers of prospective daughters-in-law were carefully scrutinized by prominent families to ensure they did not unwittingly welcome women who had fingers that showed alternate circles and waves on their fingers, as it was commonly believed that such women would bring trouble into the family, being particularly difficult to control and usually very aggressive.

In this issue of FSW we bring you some indications of destiny & personality traits based on the circles and waves on the five fingers of each hand. Guys should examine their left hands while women should look at their right hands.

Here are the two different patterns of circles and waves seen on every finger. To make a reading, look at your thumb print first, then your index finger, your middle finger, your ring finger and then your little finger in that order. This is the sequence that offers clues to your destiny & fortunes of your life.

For ease of reference we shall refer to circles as **O**s and to waves as **W** s.

Fingers: OOOOO (all whorls)

Means: This person is very confident, has a strong character and a hot temper. He/she is an independent person. The luck of this person changes dramatically in life from one period to the next. The undoing of this person will be his/her hot temper so it is vital that this person must learn to be patient and calm.
